CONSISTENT CARE. ADVANCED TREATMENTS. VISIBLE TRANSFORMATION.
BECAUSE YOUR SKIN DESERVES THE BEST.

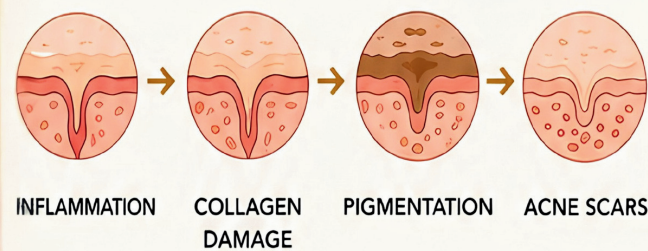

EARLY TREATMENT LEADS TO FEWER BREAKOUTS
AND BETTER, LONG-LASTING RESULTS.

UNDERSTANDING ACNE & YOUR TREATMENT JOURNEY

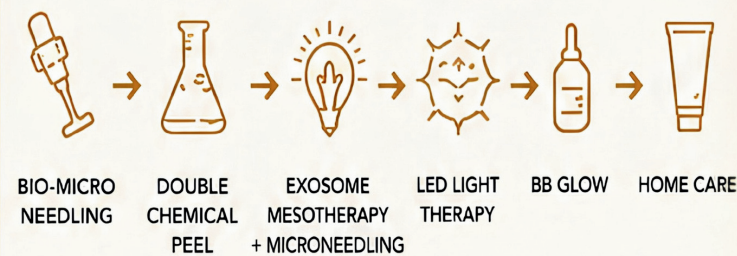

WHY ACNE HAPPENS

 HORMONES Hormonal fluctuations increase oil production and may trigger breakouts.	 BACTERIA Acne-causing bacteria multiply inside blocked pores causing inflammation.	 EXCESS OIL Excess sebum mixes with dead skin cells and blocks follicles.	 INFLAMMATION Inflammation causes redness, swelling and painful breakouts.	 STRESS Stress hormones can worsen existing acne.	 INCORRECT SKINCARE Heavy or unsuitable products may clog pores and irritate skin.
